Report of theDirector of Finance, 1950

UNITED STATES DEPARTMENT OF AGRICULTURE

REPORT OF THE DIRECTOR OF FINANCE, 1950

United States Department of Agriculture, Office of Budget and Finance, Washington, D. C., October 16, 1950.

Hon. Charles F. Brannan, Secretary of Agriculture.

Dear Mr. Secretary: I respectfully submit the following report of the Office of Budget and Finance for the fiscal year 1950 which, in addition to describing certain activities of the Office that are of current interest, covers the financial operations of the Department of Agriculture.

Sincerely,

RALPH S. ROBERTS, Director of Finance.

OFFICE OF BUDGET AND FINANCE

Introduction

The Office of Budget and Finance serves as a staff agency of the Secretary in carrying out departmental functions relating to over-all administration of the budgetary, procurement, and fiscal affairs of the Department. It has responsibility for formulating and promulgating departmental policies and procedures relating to such functions, and for providing leadership and coordination of these activities throughout the Department. These activities include the acquisition and distribution of funds; accounting; auditing; budgetary and financial reporting; budget, fiscal, and procurement organization and management; purchasing, warehousing, utilization and disposal of administrative and operating supplies and equipment; and related matters.

Emphasis continued to be given during the fiscal year 1950, to the simplification and improvement of the operations of the budget, fiscal,

and procurement functions of the Department. This effort was implemented in some instances by improvements developed in cooperation with Department agencies concerned and in collaboration with the Bureau of the Budget, General Accounting Office, General Services Administration, and the Treasury Department. Although it would not be feasible, because of the volume, to cover in detail all of the work of the Office during the year, some of the more significant developments are described in the following paragraphs.

Management Improvement Activities

Progress was made toward increased effectiveness and economy of operations through management improvements achieved by joint effort with agencies in the Department and through participation in the Department's Management Improvement and Manpower Utilization Program. A most significant part of the program this past year was a special reevaluation and reporting on individual agency management improvement activities.

Each agency of the Department prepared a plan for systematically reviewing its own operations as one means of identifying opportunities for more effective and efficient work methods, procedures, and other management practices, including policies affecting the orderly administration of program operations. A representative of this office was a member of a Department committee which worked with the agencies and reviewed these plans so as to gear them into a coordinated. De-

partment-wide effort to improve management.

In addition, each agency submitted a select list of projects for tackling the most pressing problems, the solution of which would lower costs and improve services to the public. These problems were also reviewed and critically examined by staff members working with the agencies in carrying out those projects which relate to the functional responsibilities of the office. By participating in certain of these project studies, members of the Office were able to pool and exchange information and techniques for the advantage of many agencies.

In a continuing study of tabulating machine facilities, the Office of Budget and Finance is working closely with the agencies to achieve more effective management control, greater interchange in the use of tabulating equipment among agencies, and better personnel and machine utilization. To aid in evaluating machine units, the Office developed and furnished the agencies with a number of management guides and tools, among which was a checklist for appraising tabulating units that included a machine-utilization charting device and a work-process chart. Statistical compilations were prepared by which agencies of the Department could compare the performance of their tabulating units with that of others of comparable size within the Department. In addition, the Office worked with the Bureau of Dairy Industry to develop a tabulating system for processing dairy-herd-improvement records.

Other activities of the Office in this general field included assistance in (1) the development and improvement of agency and Department forms; (2) the development of an improved and simplified system for the ordering of forms so as to reduce losses due to obsolescence and to reduce paper work in connection with reordering; (3) the simplification of procedures for paying communications bills and identifying and encouraging the use of the most economical methods of commu-

nication; and (4) the investigation of 35 management improvement

suggestions of Department- or Government-wide scope.

A number of management improvements were adopted during the year in connection with specialized activities of the Office. Such improvements are included elsewhere in this report under the appropriate subject-matter heading.

Accounting and Auditing Systems and Procedures

Continued emphasis was given during 1950 to effecting further improvements in the fiscal operations of the Department by furnishing leadership in the development of improved accounting methods and procedures; the maintenance of adequate systems of internal control; and the effective utilization of internal audit activities. In furtherance of the objectives of the joint program for improving accounting in the Federal Government, the Office participated actively in several projects for developing and testing new methods and procedures, and several pilot installations are now in operation within the Department for evaluating the results.

Illustrative of this work is a project to develop procedures that will facilitate and simplify reconciliation of agency cash accounts with those of the Treasury. It is contemplated that the new procedures may be extended on a Government-wide basis. In the auditing field, preliminary arrangements were completed for the extension of a program of comprehensive on-site audit to be conducted by the General Accounting Office in three agencies of the Department. This program will be integrated with the internal auditing and inspection activities

of the agencies.

For a number of years the Office of Budget and Finance has followed a policy of delegating to operating agencies of the Department those functions which, in the interest of good administration, could be more effectively and economically performed by them. In line with this policy, a detailed study of all fiscal activities of an operating nature performed in the Office of Budget and Finance was completed during the year. Special consideration was given during this study to the effect of current and proposed changes in accounting procedures; to recent improvements accomplished in reporting and reconciliation procedures; to modifications in agency accounting systems and procedures; and to the necessity, in view of such improvements, for continuing the maintenance of central control accounts of all appropriations and funds available to the Department, except capital funds of the several corporations.

As a result of the above study, it was found possible to discontinue many of the detailed accounting records which had heretofore been maintained on a centralized basis and to decentralize a number of fiscal functions to the operating agencies. Specific major changes in departmental accounting operations, which were approved by the Comptroller General and made effective as of July 1, 1950, are: (1) discontinuance of all Department ledger accounts other than cash and appropriation-availability accounts for unallotted departmental appropriations (those allotted to two or more agencies), and for such special and trust fund receipt accounts as are to be appropriated or allotted to more than one operating agency; (2) delegation to the agencies of responsibility and authority to approve requisitions upon the Secretary of the Treasury for disbursing funds; (3) delegation to the

agencies of responsibility and authority to administratively approve disbursing officers' accounts current; (4) delegation to the agencies of responsibility for currently reconciling the balances of their appropriation and fund accounts with balances reported by the Treasury Department; (5) elimination of departmental review of Standard Forms 1080 and 1097 prepared by the agencies for submission to the General Accounting Office; and (6) fuller utilization of information reflected in agency records in the compilation of financial data for

budgetary and reporting purposes.

These changes in the maintenance of central accounting records and the delegation of certain fiscal functions fully recognize the responsibility of each agency in the Department for the establishment and maintenance of adequate accounting records. The effectuation of these changes will make possible the strengthening of the technical accounting staff of the Office of Budget and Finance in order to more effectively carry out its responsibility in (1) assisting agencies in simplifying and improving accounting systems and procedures and (2) making periodic inspections and surveys of agency accounting operations.

Examinations and Studies of Fiscal Operations

During the year the Office conducted a number of studies of agency fiscal and accounting operations for the purpose of assisting agencies in obtaining greater efficiency and economy through the elimination of overlapping activities and nonesscritial paper work, and the improvement of accounting and reporting systems, methods and techniques. Some of the accomplishments during the year are the following: (1) New accounting systems for three agencies were developed which embody commercial accounting principles and permit the ready preparation of balance sheets, income and expense statements, and other financial and budgetary reports. One of these was completely installed by June 30, 1950. (2) Considerable progress was also made in the development of revised accounting systems for two agencies engaged in lending activities. Significant improvements and savings have already resulted from the climination of the use of youchers for some purposes and by reducing the work involved in handling funds borrowed from the Treasury. (3) The results of a special study of methods used in processing death claims were used in assisting the General Accounting Office in developing proposed legislation which will expedite settlement of death claims by the operating agencies (P. L. 636, 81st Congress). (4) Several surveys were made of payroll, leave and retirement practices as a result of which certain operations were materially improved, and the payment of employee salaries in cash has been discontinued except for emergency field operations.

The Comptroller General submitted 34 reports during 1950 covering examinations of the operations of Department field offices, as compared to 71 such reports for the previous fiscal year. Each of these reports was carefully reviewed, not only for such specific action as might be indicated to be desirable but also for the effect on Department-wide accounting and operating procedures.

Notices of exception and suspension issued by the General Accounting Office in its post-audit of expenditure vouchers of Department agencies were reviewed and analyzed. The number of such notices received declined for the second consecutive year, and the continued

efforts to obtain satisfaction of exceptions resulted in reducing the number outstanding at June 30, 1950, to 720—a reduction of more than 50 percent as compared with the balance at the beginning of the year. Exceptions stated against reimbursements for the movement of household goods received particular attention, and resulted in action by the General Accounting Office to clarify the audit requirements for this category of vouchers.

Budgetary Improvements

In furtherance of steps initiated late in the fiscal year 1949 to refine budgetary procedure so as to conform to new requirements for a performance budget, this Office developed and issued departmental policies and procedures for the guidance of agencies in preparing budget estimates. Major attention was focused on the new Program and Performance section of the Budget presentation which is the heart of the printed Budget. This section is composed of two parts. One consists of a narrative statement or summary high-lighting the most important factors pertinent to estimated dollar requirements of the budget and current years, and to actual requirements of the past The other includes a schedule of obligations by activities which indicates the projects, functions, purposes, fields of work or programs within the broader scope of the entire appropriation item, and the relative degree of emphasis placed upon the different aspects of the work, as indicated by the funds designated for each project. respect to the narrative statements, this Office worked closely with agencies, and made an intensive review of all final statements to assure that the objective of performance budgeting was realized to the fullest extent practicable.

Budget schedules of the Department have for years been expressed in terms of activities or program objectives, as well as objects of expenditure, such as travel, supplies, equipment, etc. Nevertheless, a thorough analysis of existing activity schedules was made, and a number of revisions were accomplished for inclusion in the 1951 estimates. In a few cases activity schedules were developed for appropriation items not previously subdivided into projects or activities. In its report on the 1951 General Appropriation Bill, the House Appropriations Committee expressed concern over the general lack of accounting support for amounts reported as "actual" costs in activity schedules by the various departments of the Government, and stated that the schedules presented in the budget should be so written as to provide a basis for proper accounting. While these views were generally in accord with existing Department policy, on the basis of this report and subsequent discussions with the Budget Bureau and staff of the Appropriations Committee, this Office in-

tensified its efforts to achieve this objective.

Agencies were requested, in preparing 1952 estimates, to give special consideration to revising, wherever necessary, the activity breakdowns included in the printed Budget schedules to improve the adequacy of accounting support and yet preserve to the greatest extent possible an informative functional breakdown of the program. Meetings were held with agency representatives to discuss the principles that should be followed to assure adequate accounting support for projects and functions and careful review of agency proposals for revisions of activity schedules was initiated in connection with the

formulation of estimates for the fiscal year 1952. Late in the year plans were also developed for cooperating with the Budget Bureau and the General Accounting Office in the conduct within the Department, of the survey requested by the House Committee on Appropriations to provide a Government-wide review of the budgeting and accounting procedures with respect to support which the accounts

give to the budget presentation.

There was effected, in the fiscal year 1951 estimates, a consolidation of related appropriation items, resulting in a further reduction by four in the number of such items. Another significant change was the merging of funds available under sections 10 (a) and 10 (b) of the Research and Marketing Act and the Special Research Fund with the appropriations of the various agencies handling the work. In preparing for submission of the 1952 estimates, special consideration was given to further revisions of the appropriation structure to reduce wherever possible the number of items and simplify the present structure.

Developments in Budgetary and Financial Reporting

A project which has received continuous study by this office is aimed at finding ways and means of simplifying and otherwise improving the presentation of reports on the financial aspects of the operations of the Department in an effort to promote a better understanding of the use of funds made available. As a partial solution, an analysis was developed of the distribution of the total funds, according to the general type of payment to be made, i. e., the amounts going into loans which, in effect, represent investments by the Federal Government and which will be recovered in future years; the amounts paid to producers and processors cooperating under various agricultural programs; the amounts paid to States and Territories for activities being performed on a cooperative basis; and the amount which is available to the Department of Agriculture as an organization.

One of the significant facts disclosed by this type of analysis, and one which is often overlooked, is that most of the funds are for loans or payments and only a relatively small proportion of the total is available for the many services to agriculture performed directly by the Department. This type of analysis was first used in the 1949 Annual Report. It was further refined and placed in chart form for use in presentation and explanation of the total Department of Agriculture Budget for the fiscal year 1951 before the House and Senate Committees on Appropriations.

This study also has been directed toward the development of a more descriptive functional classification of the activities of the Department. A revised classification was developed for use during the appropriation hearings for the fiscal year 1951. It has also been included in table 2 of this report.

Another approach is made through review of financial statements pertaining to operations of this Department, included regularly in publications of other Government agencies. Particular attention was given to the development, in collaboration with the Treasury Department, of an improved classification for reporting "budgetary" expenditures of this Department in the Daily Statement of the United

States Treasury. The new classification, adopted for use effective July 1, 1950, will make available to the public generally, and to users of the Daily Statement, a more detailed and informative statement of expenditures of this Department.

Supply Management

Policies and procedures to be followed in accomplishing the purposes of the Federal Property and Administrative Services Act of 1949, Public Law 152, were of major concern throughout the year. Special consideration was given to the prospect of contracting authority delegable under Title III of the Act, and request was made upon the Administrator of General Services for authority needed to facilitate program operations. Efforts were made to give effect to the objectives of the Act and the policy of the President with respect to the placement of a fair and substantial proportion of the Government's total procurement with small business firms. Because of the nature of the Department's programs, and the high degree of decentralization of its activities, close contact with small business firms is possible and a large percentage of its total procurements normally falls within the defined category of "small business."

Renewed emphasis was placed upon objective planning for an even distribution of procurement throughout the fiscal year, consistent with efficient program operations and to avoid excessive year-end buying. Complete agency reports of purchases made during the fiscal year 1949, classified by quarters, several main commodity groups, and special eategories of seasonal, continuing, and special appropriations in the last quarter, afforded a basis for comprehensive analysis. The Administrative Regulations were revised to amplify Department policy on purchasing activities near the end of the fiscal

year.

Close liaison with the General Services Administration, through membership on its Issuance Review Committee, afforded an opportunity for the advance consideration and review of certain proposed policies, methods, and regulations of that agency. Department-wide interest in standardization was renewed by reconstitution of the committee established in 1948 to consider matters relating to equipment and supply quality standards which concern the Department, and to give effect to Department cooperation with the American Standards Association. A member of this Office represented the Department on the Interdepartmental Standards Council which is concerned with the problems of national and international standards as they affect the Federal Government. A member of the Office also served on an advisory committee established by the General Services Administration to assist in developing a central freight traffic management organization for Government agencies, and an understanding was reached concerning certain aspects of the proposed plan with relation to agricultural programs. Cooperative studies were carried on with the General Services Administration to improve the Federal Supply Schedule, and to develop a higher degree of planned requisitioning by agencies of the Department on the supply centers, in order to reduce to a minimum the number of small dollar value orders.

Other major cooperative supply management activities of a continuing nature included (1) development and improvement of Federal specifications; (2) studies of replacement standards for trucks, and the development of an improved system of reporting operating and cost data for motor vehicles; and (3) participation in plans for the establishment of the proposed uniform Federal catalog system.

Plans for Further Delegations of Contracting Authorities

The Department's long-standing policy of gearing supply functions as directly as possible to program operations has resulted in increased delegations of field contracting authorities, with only the larger and more complex procurement transactions reserved for Departmental review and handling. The trend in procurement activities within the Department continues to follow this established decentraliza-tion pattern. During the past year, several factors have contributed to facilitate decentralized procurement activities. Under the increase from \$100 to \$500 in the open-market purchase limitation authorized by Public Law 152, 81st Congress, many transactions which formerly required formal advertising and award are now handled more expeditiously and economically by informal price inquiries and offers, in the manner common in private business. Also, there has been a gradual expansion of the supply items handled by Government-wide sources (Federal Supply Service warehouses, Federal Supply Schedule contracts, Post Office contracts for envelopes, Government Printing Office schedules for paper, forms, etc., Prison Industries, Blind-Made Products, Navy oil contracts, etc.) against which purchase orders can be issued. In addition, as experience has been gained in the handling of contracts in the field, and as the need arose, there has been a general broadening of contracting authorities.

These expanded activities naturally decreased the number of contract cases submitted for Departmental handling. Many of the cases in this latter category involved, primarily, implications closely related to agency technical program matters, and because of these strong program implications, high agency staff consideration in the matter of specifications, sources of supply, costs, qualifications of bidders, etc., is required. All of these factors made it increasingly evident as the year progressed that few contract cases needed to be forwarded for Departmental award and consideration. Accordingly, a study was made and discussions were held with various agencies to explore the possible efficiency and economy—where work could be accomplished without an enlargement of their supply organizations—of having the contracting handled to completion by the procuring

agency to the fullest extent possible.

Special Property Survey

During the fiscal year 1950, the Department conducted an extensive survey of supply and equipment utilization in all of its agencies. Each agency head was requested to proceed with a special utilization survey of all property for which the agency was responsible and to report promptly as excess all items determined to be not essential to efficient and effective administration of the agency's activities.

Although the reports on the above survey are receiving continuing study and attention, it is clear that much was accomplished in identifying and reporting as excess all property on hand not essential to program needs, and in taking appropriate measures to insure continued compliance with applicable policies, regulations, and good property utilization practices. To insure thoroughness in the conduct of the survey and uniformity of results, the re-examination of property needs by individual agency operating personnel throughout Agriculture was supplemented by personal reviews, by departmental and agency headquarters administrative officials, of property management and utilization practices at field locations where more than 90 percent of the property is located or where its use receives direct control.

An immediate result of the survey was a substantial increase in the rate at which property was reported by Department agencies as excess to their needs. Of considerable significance also is the fact that more than one-third of this property is now being utilized by other Agriculture agencies, thus filling existing needs without procurement from commercial or other Government sources. The balance, of course, has been, or is being disposed of in accordance with GSA instructions. Of more lasting value is the redefining of property-management responsibilities throughout the Department. There appears to be little doubt that each employee and organizational unit is now more keenly aware of individual responsibility for the most effective use and efficient care of all assigned property.

Legislative Reports and Services

For a number of years the Office of Budget and Finance has served as the focal point in the Department for the coordination of action relating to the handling and clearance of legislative matters affecting Department programs, Here the legislative program is reviewed from the standpoint of its relation to over-all budgetary, fiscal, and related policy matters. Also, assistance is furnished to agencies of the Department and the Secretary's Office in the development and appropriate clearance of proposed legislation and reports thereon. Several bills introduced in the Second Session, Eighty-first Congress, involved administrative provisions of particular concern to this office. Examples include: Public Law 784, Budget and Accounting Procedures Act of 1950; H. R. 9430, a bill to simplify administrative procedures; H. R. 8706, relating to employee surety bonds; and others. assistance was given by members of the Office in connection with the reports and hearings on these and other pieces of proposed legislation. Members of the Office also served on intradepartmental committees such as those which formulated legislative proposals for development of the agricultural resources of major river basins, Alaska, and other areas.

Pursuant to a specific request by the Chairman of the House Committee on Agriculture, a member of the Office was assigned to serve as liaison between the Committee and the Department. In this capacity, assistance is given to the Chairman, members of the Committee, and staff in obtaining needed information regarding Department programs, thus greatly facilitating the work of the Committee and the Department.

CHARTS AND TABLES OF FINANCIAL OPERATIONS OF THE DEPARTMENT OF AGRICULTURE

The charts and tables included in this report reflect the over-all financial aspects of the Department's activities in the fiscal year 1950. The charts and certain of the tables have been prepared to present the Department's financing in summary form. However, for the information of those who may be interested in more detail, additional tables are included which provide a further breakdown of the more significant types of data. In order to give an indication of current trends, information for the fiscal years 1948 and 1949 (adjusted where necessary to a basis comparable with the fiscal year 1950) is also included. In two instances the tables cover a 10-year period to permit a comparison based on a greater number of years.

Charts

For the first time this report includes analyses of appropriations, and REA and FHA authorizations for loans, expressed in chart form. Two such charts are included. The first, Chart 1, points up a fact frequently overlooked in considering the total appropriations for the Department, namely, the relatively small proportion of the total funds (the bottom segment of each column) that is provided for the Department of Agriculture as an organization. The chart indicates that in 1950, for example, only 21.6 percent of the total was for that purpose, while over 78 percent constituted loans (which will be repaid to the Treasury), payments to States, and other program expenditures. Of the 21.6 percent, about 4.6 percent was for the administrative and operating costs incident to the loans and payments reflected in the upper segments of the columns, leaving only about 17 percent for direct expenditure by the Department for agricultural research, insect pest and plant disease control, marketing and regulatory activities, soil conservation districts program, forestry, flood control, and all of the other activities financed by appropriations to the Department.

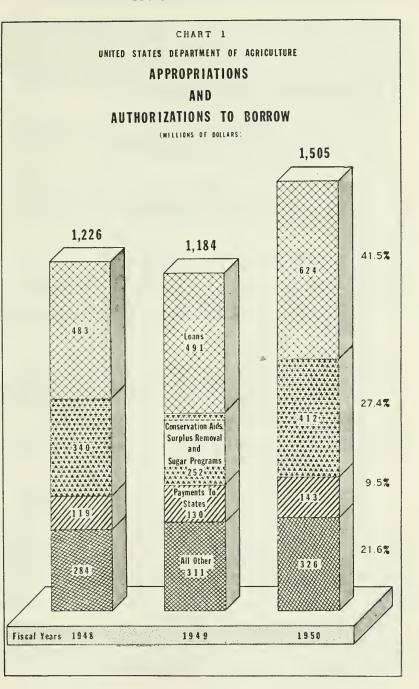

Chart 2 shows the distribution of the total appropriations by major functions. A similar distribution showing the dollar amounts for each of these fiscal years is also included in table 2. In preparing this chart the various items have been grouped within each function as follows:

1. Rural electrification and telephone loans.

2. Conservation and development of resources:

Conservation and use of agricultural land resources

Soil Conservation Service (except research)

Land utilization program

Payments to counties from submarginal land program

Water conservation and utilization projects

Flood control

Forest Service (except research)

Forest development roads and trails

3. Production, purchase, and distribution of commodities: Removal of surplus agricultural commodities

National School Lunch Act

Acreage allotments and marketing quotas

Sugar Act

4. Farm loans:

Furmers Home Administration

Farm Credit Administration (except research)

Includes the research activities of the Department as shown on table 5.

6. Plant and animal disease and pest cantral:

Control of forest pests (including white pine blister rust control)
Animal disease control and eradication (including foot-and-mouth disease eradication in Mexico)

Insect and plant disease control

Foreign plant quarantines

7. Cooperative extension work.

8. Marketing—Regulatory and service activities:

Marketing services (except research) Marketing service projects under Research and Marketing Act, Title II

Commodity Exchange Authority

Meat inspection (except research project) Administration and enforcement of Process Butter Act

9. Crap insurance.

10. Other:

Bureau of Agricultural Economics (except research)

Office of Foreign Agricultural Relations

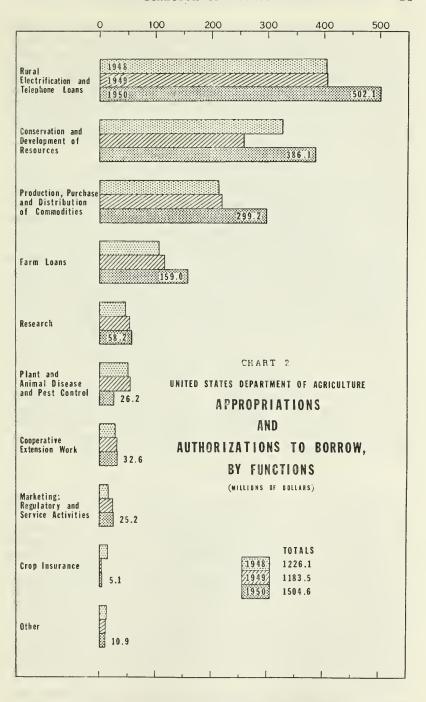

National Arboretum

Office of the Secretary Office of Solicitor

Office of Information

A comparison of the appropriations and authorizations to borrow for fiscal year 1950 with those for the fiscal year 1949 indicates a number of significant changes in the level of certain program opera-The increase in the first function at the top of the chart results from the inauguration of the rural telephone loan program in the fiscal year 1950, for which a borrowing authorization of 25 million dollars was provided, together with an increase in the borrowing authorization for rural electrification loans.

The change in "Conservation and development of resources" is accounted for primarily by the increase in the agricultural conservation program from about 145 million dollars to approximately 257 million dollars, and also by an increase of about 5 million dollars in the soil

conservation districts program. The increase in the third functional item reflects an additional 8.5 million dollars for the national school lunch program and approximately 68 million dollars more for the removal of surplus agricultural commodities from the normal channels of trade in accordance with section 32 of the Act of August 24, 1935, which appropriates each year for this purpose 30 percent of the customs receipts of the preceding calendar year. In anticipation of greater activity in connection with acreage allotments and marketing quotas, an increase of about 15 million dollars was appropriated and is likewise reflected in this category for "Production, purchase, and distribution of commodities."

With respect to "Farm loans," a significant development in the fiscal year 1950 was the initiation of the farm housing program authorized by Title V of the Housing Act of 1949. A total of 30 million dollars provided for this program is included in 1950 in the farm loan category and the additional increase over 1949 was mainly in funds for production loans made by the Farmers Home Administration.

The comparison of appropriations for "Research" for the three fiscal years reflects the increasing emphasis given to this work since passage of the Research and Marketing Act of 1946. The apparently large decrease for "Plant and animal disease and pest control" results from the manner in which the program for the eradication of foot-and-mouth disease in Mexico is financed. Since it is extremely difficult, if not impossible, to estimate the requirements of this program in advance, Congress has given the Secretary authority to spend from any funds available to the Department such amounts as may be necessary, with the understanding that appropriations would be made later to reimburse funds used for this purpose. Such appropriations are included in this chart for the fiscal years 1948 and 1949, but the appropriation for 1950 has not yet been made. For "Crop insurance," there was included in 1948 an appropriation of 10 million dollars to the Secretary of the Treasury to enable him to subscribe to capital stock of the cor-The other amounts included in the chart represent only the administrative costs incident to crop insurance activities.

Tables

In table 1 the total funds available, excluding funds arising from corporate operations, and the obligations incurred arc shown both by type of fund and by agencies of the Department. With a view to making this table more informative and somewhat easier to relate to the other tables in the report, the analysis by type of funds is given in greater detail than was indicated in reports for previous years.

In view of the significance of current appropriations and borrowing authorizations it has seemed desirable to include certain analyses of these funds. Tables 2 and 3 are summary and detailed statements of appropriations for the fiscal years 1948, 1949, and 1950, and table 4 presents a comparison for the 10-year period 1941 through 1950.

presents a comparison for the 10-year period 1941 through 1950.

In view of the importance of agricultural research and its interest to those concerned with the work of the Department, a statement of funds used for research for the fiscal years 1941 through 1950 is given in table 5.

Expenditure data reflecting payments made under obligations incurred in the respective years shown, as well as liquidation of unpaid obligations from prior years, is reflected in table 6 for all funds except

those disbursed in connection with corporate operations.

Receipts to the U.S. Treasury arising from operations of the Department are shown in table 7. In addition to collections of Rural Electrification Administration and Farmers Home Administration loans, other significant sources of revenue are sales of National Forest timber, and fees collected for inspection and grading of agricultural commodities.

Tables 8 and 9 show in more detail the totals reflected on table 1 for transfers made to the Department by other agencies and for trust

funds.

Table 10 presents a commercial-type statement of sources of funds and their application for certain noncorporate lending agencies and activities of the Department. These agencies and activities are included also in the preceding tables covering all of the noncorporate agencies, but in view of the nature of their operations, it is believed

that a table of this type will be interesting and informative.

The corporations of the Department are financed by capital subscriptions or borrowings rather than by means of direct appropriations made each year (with the exception of the appropriation for administrative expenses of Federal Crop Insurance Corporation). Therefore, since their operations under corporate charters differ in a number of substantial respects from other activities, commercial-type statements on the financial operations of the corporations are shown separately in tables 11, 12, and 13.

¹ Excludes eapital fund activity of the Commodity Credit Corporation, Federal Crop Insurance Corporation, and institutions supervised by the Farm Credit Administration, for which see tables

¹¹ through 13.

² Consists of the following: To Department of the Interior, \$175,000 from "Removal of Surplus Agricultural Commodities," and \$996,600 from "Control of forest pests"; to General Accounting Office, \$260,800 from Agricultural Conservation Program funds, and \$25,631 from "Sugar Act"; to Treasury Department, \$160,909 from Agricultural Conservation Program funds; and to Public Health Service, \$500 from "Salaries and expenses, Office of the Secretary".

and expenses, Office of the Secretary...

§ For detailed listing of these items, see table 8.

§ For detailed listing of these items, see table 9.

§ Includes §\$4,877.774 of the total of \$\$362,046,649 transferred from the Economic Cooperation Administration. The remaining \$\$27,668,875 was obligated for procurement of agricultural commodities by the Commodity Credit Corporation and is included in the financial statements of the Corporation reflected in tables II, I2, and I3.

Table 2.—Summary of appropriations and FHA and REA loan authorizations for the fiscal years 1948, 1949, and 1950

[Includes all supplemental and deficiency appropriations. Where necessary, figures are adjusted for comparability on basis of appropriation structure in 1950]

¹ The 1950 Agricultural Appropriation Act provided language authorizing the Secretary to transfer from any funds available to the Department amounts necessary to finance the eradication program, subject to later reimbursement when appropriations therefor are made.

² For the purelase of an option on suitable land, and preparation of plans and specifications for a laboratory, the total cost of which shall not exceed \$25,000,000.

³ Act provides authorization to borrow from Secretary of Treasury in lieu of direct appropriation.

⁴ In addition, \$588,101 available from prior-year balance for liquidation of the 1947 and prior crop-year

programs.

5 Consists of \$350,000,000 borrowing authorization for rural electrification loans and \$120,000,000 borrowed under the additional authorization of \$150,000,000 contingent upon certification of need by the Secretary of Agriculture.

Table 3.—Appropriations and FHA and REA loan authorizations for the fiscal years 1948, 1949, and 1950

[Note. Figures in brackets ([]) not included in totals. Includes all supplemental and deficiency appropriations. Where necessary, figures are adjusted for comparability with the appropriation structure in 1950.]

¹ Section 307, Title III of the Second Deficiency Appropriation Act, 1948, repealed section 2 (d) of the

Penalty Mail Act requiring payments into the general fund of Treasury for penalty mail costs.

² Transferred from the appropriation made by section 12 (a) of the Agricultural Adjustment Act, approved May 12, 1933, and from "Administration of Sugar Act," Funds now appropriated to ² Transferred from approved May 12, Department of State.

³ Act provides that not to exceed \$50,000 shall be available under the subappropriation "Animal Hushandry" for liquidation of Agriculture Remount Service on or before Dec. 31, 1949.

⁴ The Agricultural Appropriation Act, 1948, provided \$5,000,000 as a working capital fund to be reimhursed from fees charged packers for total cost of meat inspection services effective July 1, 1947. The 1949 and 1950 Acts provide direct above to meat inspection services elective 3 mg 1, 1941. The 1949 and 1950 Acts provide direct appropriations for meat inspection services.

§ For the purchase of an option on suitable land, and preparation of plans and specifications for a laboratory, the total cost of which shall not exceed \$25,000,000.

1950 Agricultural Appropriation Act authorized the Secretary to transfer from any funds available to the Department amounts necessary to finance the eradication program, subject to later reimbursement when appropriations therefor are made. Pursuant to this authorization \$24,460,000 was advanced from Commodity Credit Corporation funds, which together with \$8,083,907 balance available from 1949, provided a total of \$32,543,907 available for expenditure in 1950.

7 Transferred from the appropriation made by section 12 (a) of the Agricultural Adjustment Act, approved March 1962.

proved May 12, 1933.

§ In addition, the 1950 Agricultural Appropriation Act provides \$100,000 contract authority for use in connection with establishment of the irrigation experiment station at Brawley, Calif.

§ The 1950 Agricultural Appropriation Act provides for transfer of \$250,000 to "Forest Pest Control

10 Includes \$750,000 available until Sept. 30, 1949.

II In addition, \$250,000 available by transfer from "Control of emergeucy outbreaks of insects and plant diseases.

12 Includes \$1,747,500 available until June 30, 1950.

- 13 In addition, prior-year balances available.
 14 In addition, \$42.702,000 available from advance conservation material fund.
 15 Act authorizes the formulation and development of a 1950 crop year program in the amount of \$300,000,000, of which not to exceed \$15,000,000 may be used for acreage allotments and marketing quotas
- Includes \$40,023,930 originally rescinded by the Department of Agriculture Appropriation Act, 148, but restored by the Foreign Assistance Act of 1948.

 Includes \$65,000,000 transferred from section 32 funds.

18 Transfer from section 32 funds.

 Pact provides for a direct appropriation in lieu of transfer from section 32 funds.
 Act provides authorization to borrow from Secretary of Treasury in lieu of direct appropriation.
 First Deficiency Appropriation Act, 1949, extends until June 30, 1950, availability of funds appropriated by the Second Deficiency Appropriation Act, 1948, and also makes these funds available for assistance in connection with damage hy floods, storms, or other natural calamity, during the calendar years 1948 and 1949.

²² Consists of \$350,000,000 borrowing authorization for rural electrification loans, and \$120,000,000 borrowed under the additional authorization of \$150,000,000 contingent upon certification of need by the

Secretary of Agriculture 23 In addition, \$588,101 available from prior-year balance for liquidation of the 1947 and prior crop-year

programs.

Supply and distribution of farm labor % Thissock moth control. Other items. Deduct amounts included in above figures transferred for Pay Act costs	Total

I Includes \$25,400,000 appropriated in Second Deficiency Appropriation Act, 1948, to repay funds transferred in 1948 from the Cominodity Credit Corporation pursuant to the Supplemental Appropriation Act, 1948, and \$5,000,000 carried in Emergency Appro-

priation Act, 1948. In addition, prior-year balance of \$337,549 available.

Appropriated in the Third Deficiency Appropriation Act, 1949, to repay funds transferred from the Commodity Credit Corporation for this program. In addition

prior-year balance of \$1,080,419 available.

tary to transfer from any funds available to the Department amounts necessary to finance the eradication program, subject to later reimbursement when appropriations therefor are made. Pursuant to this authorization \$24,460,000 was advanced from Commodity Credit Corporation funds, with together with \$8,083,907 halance available from 1949, provided a total of \$23,543,007 for 1930.

*In 1945, \$5.4 millions available, composed of \$3 millions reappropriation from 3 The 1950 Agricultural Appropriation Act provides language authorizing the Secre-

1942-43 balances, and \$2.4 millions of the 1944 appropriation which is available until expended; in 1946, \$4.1 millions, composed of \$5.8 millions in funds available (\$4.3 millions reappropriation plus \$1.5 millions prior year balances) less \$1.7 millions reseinded by the act of Feb. 18, 1946, Public Law 301.

Act provides authorization to borrow from Secretary of Treasury in lieu of direct 5 Appropriations to Secretary of the Treasury.

appropriation.

7 The First Deficiency Appropriation Act, 1949, extended until June 30, 1950, availability of funds appropriated by the Second Deficiency Appropriation Act, 1948, and ability of funds appropriated by the Second Deficiency Appropriation Act, 1948, and also made these funds available for assistance in connection with damage by floods,

storms, or other natural calamity, during the calendar years 1948 and 1949.

Represents appropriations to enable the Secretary of the Treasury to subscribe to capital stock of the Federal Crop Insurance Corporation. ie Appropriated to War Department specifically for transfer to Department of and prior crop-year programs.

12 The 1950 Act authorizes the formulation of a 1950 crop-year program in the amount of \$300,000,000, of which not to exceed \$15,000,000 may be used for acreage allotments \$42,702,000; 1949, \$5,148,601.

11 In addition, funds available from advance conservation material fund: 1948,

conservation program in fiscal years 1941 through 1946, and administrative expenses 13 Acreage allotments and marketing quotas were handled as a part of the agricultural

or this program were not maintained separately from administrative expenses of the agricultural conservation program. Accordingly, amounts for acreace allotments and marketing quotass, fixeal years 1941 through 1946, are included in the totals shown above for those years for "Conservation and use of agricultural land resources." 14 Includes \$40,023,930 originally rescinded by the Department of Agriculture Appro-

If the school-lunch program was carried on as a Section 32 activity, 1940 through 1946, in 1947, 1948, and 1999 the program was conducted under the provisions of the National School Lunch Act, approved June 4, 1946, the Congress authorizing the use of Section 35 through in lieu of direct appropriations for that purpose; in 1950 a direct appropriation priation Act, 1948, but restored by the Foreign Assistance Act of 1948.

was provided in lieu of transfer from Section 32 funds.

restoration of the capital impairment of the Commodity Credit Corporation. In lieu of an appropriation for restoration of capital impairment, the Government Corporations Appropriations Act, 1947, provided for cancellation of Commodity Credit Corpora-tion notes held by the Secretary of the Treasury in the amount of \$921.5 millions; the 16 Represents appropriations in 1942 and 1945 to the Secretary of the Treasury for Second Deficiency Appropriation Act, 1947, provided for the cancellation of an additional \$641.8 millions.

Treasury; the balance of \$3,865,204 represents expenses incurred in carrying out the 7 Of this original fund, \$31,134,796 has been returned to the surplus fund of program.

18 1943 amount appropriated to Office for Agricultural War Relations, which was later merged with War Food Administration; 1945 amount excludes \$2 millions rescinded by the act of July 3, 1945, Public Law 127, 1946 amount excludes \$3.1 millions rescinded by the act of Feb. 18, 1945, Public Law 301. 19 Consists of \$350,000,000 borrowing authorization for rural electrification loans and

\$120,000,000 borrowed under the additional authorization of \$150,000,000 contingent upon

certification of need by the Secretary of Agriculture.

² Program has been liquidated in accordance with the act of Apr. 28, 1947 (Public Law 40). Funds for liquidated in accordance with the base of the program, which were limited to \$258,500 by the Second Deficiency Appropriation Act. 1947, continued available until 10m 30, 1948. The remaining unobligated balances of appropriated funds together with \$50,000 of the receipts derived from the sale of lahor camps and facilities are available until expended for purposes of disposing of such facilities in accordance with the act of July 31, 1947 (Public Law 298). The Housing Administration. ²¹ Transferred from appropriations previously made to the Department and sbown as deductions to avoid duplications in the totals for these years.

¹Reflects expenditures on checks-issued basis, with deductions made for credits arising from repayments and refunds to the various funds. Amounts cover all payments made during each of the years indicated, including some payments of obligations incurred in prior years, from (1) general, special, and trust funds available to the Department of Agriculture; (2) appropriations made to the Secretary of the Treasury for purehase of capital stock of the Federal Crop Insurance Corporation; and (3) amounts advanced to the Department under borrowing authorizations for Farmers Home Administration and Rural Electrification Administration loans. Also reflects activity in (1) the various revolving funds of the Farm Credit Administration and (2) the Disaster loan revolving fund established pursuant to Puhlic Law 38, 81st Congress. Excludes expenditures made by the corporations of the Department in carrying out their respective operations (financial statements for these corporations are included in tables 11, 12, and 13). The announts shown have been adjusted where necessary for comparability with the appropriation structure of the Department in the fiscal year 1950.

adjusted where necessary for comparability with the appropriation structure of the Department in the fiscal year 1950.

I have a structure of the Department of the fiscal year 1948 meat inspection work was financed from a five million dollar revolving fund which was reimbursed from fees charged packers for the total cost of the service. The expenditures shown for 1948 consist primarity of outstanding reimbursements which were in process of collection at the end of the year. Beginning with the fiscal year 1949 the meat inspection service

expenditures shown for 198 consist primarily of outstanding reimbursements which were in process of collection at the end of the year. Beginning with the fiscal year 1949 the meat inspection service was again financed by Federal appropriations.

3 This program is financed by advances from the Commodity Credit Corporation in accordance with the authority centained in Department of Agriculture Appropriation Acts. These advances are recorded as minus expenditures in this account and the negative balance in 1949 indicates an excess of advances made over funds expended for the program. The 1950 figure reflects repayment to CCC of advances made in 1949, for which an appropriation of \$34,000,000 was made in 1950.

4 The amounts reflected for this item represent printing and reproduction costs paid directly from this appropriation. Most of the funds available for this program are transferred to the consolidated accounts for "Administrative expenses, section 392" and "Local Administration, section 388," and the expenditures are reflected in the amounts shown for those accounts.

5 This program was liquidated in the fiscal year 1948 in accordance with the Act of April 28, 1947 (Public Law 40, 80th Congress). The remaining unshligated halances are available until expended for disposing of labor camps and facilities in accordance with the Act of July 31, 1947 (Public Law 298).

5 Minus figures reflect repayments of Government-subscribed earlial stock and raid-in surf lus.

7 Amount shown for 1948 resulted from gross expenditures of \$1,407,430 and collections of \$956,389. In 1949, gross expenditures were \$12,525 and collections were \$609, 60.

8 To avoid duplication, there are excluded \$517,817,453 in 1948, \$669,574,359 in 1949, and \$423,273,304 in 1950 expended for the procurement of agricultural commodities by the Commodity Credit Corporation since such activities are included in the financial statements of the Corporation in tables 11, 12, and 13.

Minus figure represents excess of repayments or working fund advances over expenditures.

1.3. of the Regional Agricultural Credit Corporation of Washington, D. C., and the transfer of 11st functions, saxets, lishlithies etc., to the Secretary of Agriculture. The Secretary of Agriculture has delegated the functions, powers, and authorities conferred by Public Law 38, except the power and authority to designate areas or regions where production disasters have caused a need for agricultural credit, to the Administrator 38, of the Farmer Hone Administrator

Prepared from reports submitted pursuant to Budget-Treasury Regulation No. 3. Review, issued under Excutive Order No. \$512, as amended. Reflects certain adjust-ments for purposes of uniformity and comparability.

**Includes activities of former Regional Agricultural Credit Corporation of Washington. D. C. See footnote 3.

**Isstablished effective Apr. 16, 1949, pursuant to the provisions of Public Law 38, 31st Congress, approved Apr. 6, 1949. This legislation also provided for the dissolution
